

**NAME**

`dvitomp` – convert a TeX DVI file to a MetaPost MPXFILE

**SYNOPSIS**

**dvitomp** [*options*] *dvifile* [.dvi] [*mpxfile* [.mpx]]

**mpost --dvitomp** *dvifile* [.dvi] [*mpxfile* [.mpx]]

**DESCRIPTION**

**dvitomp** translates the given *dvifile* to a MetaPost MPXFILE. The default *mpxfile* is the base-name of *dvifile* extended with ".mpx".

**OPTIONS**

**-help** write usage summary and exit.

**-version**  
output version information and exit.

**BUGS**
